Pin Hole Tester

Pinholes can be a major headache in high barrier packaging for medical, industrial and food packaging. Pin hole tester also known as the Light Box, this is an equipment which can help detect pin holes in aluminum foils used in pharmaceutical packaging.

Pinholes are micro leaks in the foil surface which can reduce the shelf life or stability of the product they are used to protect.

Purpose of the Pin Hole Tester :

Al foils and films that are used in food Packaging laminates to enhance the barrier properties of package and to protect its content from gas/moisture permeation and also from light. Thinner gauges of AL foil contain pinholes through which moisture and oxygen from the environment can enter the package accelerating the degradation of the contents. Presence of excessive pinholes in the foils will significantly hamper the shelf life of such products.

Key Features

- ✓ Glass top over a high intensity diffused light source (CFL)
- ✓ Blackout Hood to prevent room light from falling on the Test Sample's top surface.
- ✓ Digital Counter (Manually operated)
- ✓ Wide Illuminated test area
- ✓ Integrated with Digital Event Counter and manual Count switch.
- ✓ With LED Display
- ✓ With ON/OFF switch.
