

Co-efficient of Friction Tester

Model No. PCOF - 159

Coefficient of Friction Tester is a consistent tool to indicate the starting and sliding friction of plastic films and sheets when sliding over itself or other substance at specified test condition. PRESTO Coefficient of Friction Tester is manufactured under various Test Standards ASTM D618, ASTM D 883, BS 2782, and ASTM D 1894.

Available in Computerized model also.

- Microprocessor based display for accurate test results
- Display for Dynamic and Kinetic Friction - Force
- Highly accurate test results under sliding friction.
- Slider Block for performing tests – Sample to Sample, glass or metal
- No slippage in case specimen is tightened uniformly using fly screws without any loops.
- Bright LED display
- Feather touch controls
- Compressive force clamp with spring operated

Coefficient of friction reveals the stack ability of plastic films. Friction could result from uneven film thickness which leads to uneven film strength. Coefficient of friction tester tells about the degree of abuse a plastic film will sustain without damaging the contents.

Key Specifications:

Load Cell Capacity	3 Kgf
Display	LED (Digital)
Accuracy	± 2% at full load (with master load)
Least Count/Resolution	3 gm
Power	220V , Single phase, 50 Hz
Speed	150 ± 30 mm/min
Motor	1/4 HP Single Phase , 1440 rpm

Highlights:

Safety Switch	Yes
Material	Mild Steel
Finish	Powder coated Havel Gray & Blue combination finish and bright chrome / zinc plating for corrosion resistant finish
Dimensions	820x400x515 mm

The Coefficient of Friction tester measures the sliding friction. User can calculate the Coefficient of Dynamic and Static Friction after reading the displayed load value.

Optional Features:

- Coefficient of Friction Tester Digital cum computerized models also available
