

Impact Resistance Tester For Paints – Direct

Model No.: PIR-68

Impact Resistance Tester for Paints - Direct is a consistent tool useful for testing on coatings for crack formation; breaking off; adhesion and elasticity. A bulge is formed in the sheet metal by a falling weight with a hemispherical end. PRESTO Impact Resistance Tester for Paints - Direct is designed as per **Standards** : ASTM D2794-93(2010), ISO 6272-1:2011.

Features :

- High Quality rugged structure with corrosion resistant main body
- Provision of Punch coupled with standard weights
- Momentum of Impact is more on the sample
- Fast Guiding Mechanism
- Single handed hassle free operation
- Highly accurate test results
- Unique and efficient sample locking arrangement

Key Specifications:

Maximum Impact Height	1000 mm / 1 meter
Diameter of Punch	20.0 mm \pm 0.3 mm
Diameter of Die	27 mm \pm 0.3 mm
Maximum Weight	1kg / 2kg

Highlights:

Lift Mechanism	Manual (Through Pin)
Material of Main Body	Steel & Aluminium
Dimensions	152 x 295 x 1380 mm

PRESTO Impact Resistance tester for Paints Direct is used mostly in Paint Industry. The energy of load exerted can be varied either by using different heights of fall or different dropping weights.

Coating attached to substrates are subjected to damaging impact during the manufacturing of Articles and their use in service.
